Eduroam

▷ **Home**   ▷ **network**   ▷ **wireless**   ▷ **services**   ▷ eduroam

Eduroam is an international federation of academic institutions which allows its users to visit other organizations and use the same username and password as they would use at their home institution.

Eduroam institutions span Europe, Asia-Pacific, Canada, and the USA.

Oxford users

Oxford users can use eduroam in Oxford and at other participating organizations.

Oxford eduroam uses the OUCS Remote Access account username and password.

Oxford users should ensure that their eduroam setup is working correctly in Oxford before visiting other eduroam institutions.

Oxford visitors

Oxford eduroam implements JANET Roaming Service Tier 2.

OUCS is unable to provide technical support to non-Oxford eduroam users visiting Oxford.

Firewall restrictions

A small number of outbound ports are blocked. See the ACL blocks page for the current list.

Configuration instructions

Generic Service details to help setup any client

eduroam configurator: Users of Windows Vista and above can use an automatic 'configurator' to configure their eduroam settings. Both a 64-bit and 32-bit version of the configurator is available for download from the Ashmolean's eduroam page (maintained by Anjanesh Babu at the Ashmolean Museum). *Please note: the configurator is not maintained or supported by IT Services, we simply provide the link here for your convenience.*
